

Changing the Seasonal Year

If you have generated a roster and/or passes, please confirm that the correct seasonal year appears.

If the date shows 2010-2011, this is incorrect. The dates must match the current seasonal year (2011-2012).

To correct the years please follow these instructions:

Log into the club account and click on the registrar tab

Click on the Options tab in the grey bar (If logging in under a sub-user account the tab may be named differently)

Change the seasonal year to **2011-2012**

It must have the current seasonal year and may not be left blank.
