

Got Soccer Support

Got Soccer has created videos that are posted in their support section that provides detailed instruction on the functions of the club tab, uploading players, adding players to teams, and sending teams to the registrar tab. These can be found at <http://support.gotsport.com/clubsite/?p=2951>

These videos are a great start for new registrars, however, they are not Florida specific as they are created so they can be viewed by all the state associations that use Got Soccer, and each state has different rules and procedures.

Got Soccer also has a video on creating rosters and passes at <http://support.gotsport.com/clubsite/?p=714>

Please remember that clubs are only to create new accounts for players that do not have existing Got Soccer accounts. Use the player search feature under the player tab, and you can import available players into your club. All players in FYSA will be marked as Not Registered on or around July 5. Do not create new accounts for players that are new to your club, unless you have determined that they do not already have a Got Soccer Account. Do not create accounts for new players till after July 5, or they will be registered for the 2010-2011 season and you will be billed.

Any club that needs additional support not provided by the FYSA memos posted on the FYSA registration page, http://www.fysa.com/registration/index_E.html, send an email to cpacheco@fysa.com and we can schedule a webinar using your existing account.

We will be sending out a memo on the recent upgrades that Got Soccer has added, this will include information on the 1 registration event that all clubs will be required to use, changes to player look up, and how to utilize team manager accounts.
