

Got Soccer Accounts and Affiliation

Got Soccer has uploaded the players from the 2009-2010 season into the individual club accounts. It is possible that clubs will have duplicate player accounts. The office will be reviewing these during the next few weeks, and advising you of any action that you should take.

Please do not delete or attempt to merge these duplicate player accounts at this time. Got Soccer will set all players as inactive as we begin setting up for the 2010-2011 season.

Most clubs will have players listed in their account that are too old or no longer with the club. For players that you want to delete from your club account, open up the player profile, and there is a delete button. This will remove the player from your list, but leave all of the player history intact, and the player can be imported into any other club.

Coaches have not yet been imported as we are setting up the registration and risk management for next season and we do not want them registered accidentally. You will receive instructions shortly regarding your returning coaches. If you currently have coaches in your account that you want removed, the process is identical to the players, open up the coach account, and click on the remove button.

The 2010-2011 affiliation form will be available to the Agent of Record (Master Account holder) in the Got Soccer site around June 1. This form needs to be submitted with payment to the FYSA office. These forms are due before any players or coaches can be registered for the 2010-2011 seasonal year and no later than Sept 1, 2010. All associate affiliates must submit the affiliation form before any sanctioned games may occur.

All birth certificates should now be uploaded in the Got Soccer system. Do not send to the office via email or fax.
