

Interstate Permission

All players coming from another (current year transfer) Youth or Adult State Association must have a release signed by the official registration chairman of the out of state association before they will be allowed to register with FYSA. When FYSA receives this interstate permission from the other state, FYSA will then register the player.

For players currently registered with FYSA who move to another state and wish to register with that state association, FYSA has the Interstate Permission form posted in the secure section of the website, in the download forms section. This form must be completed by the player's current registrar, and then forwarded to FYSA for processing to the other state association.

For players currently registered with another state association who wish to guest play with a Florida Team,, those players must first obtain the appropriate permission from their home state association, which must then be forwarded to FYSA's office.

For players currently registered with FYSA, who wish to guest play with a US Youth Soccer team from another state association, **if the play is within the state of Florida**, their registrar must complete the FYSA Guest Player form, available in the download forms section of the secure section of the website. This form once completed by the registrar, must be attached to the other State Association's Official State Roster to verify eligibility.
