

FYSA will be transitioning soon to new software (Got Soccer) for registration, team and club management. There are some differences in terms and process with the Got Soccer software and what FYSA currently uses. Since the process of registering and rostering will be slightly different, we have a timeline and terms listed below to help during this transition.

After the conclusion of State Cup Finals on May 23, 2010, all players will be “free agents” and will be able to contact other clubs or be contacted by other clubs regarding tryouts and registration for the 2010-2011 seasonal year. However, the players will still remain rostered to their current 2009-2010 teams.

On June 1, 2010, clubs may begin try outs for the 2010-2011 seasonal year. All players will still remain rostered to their 2009-2010 team, with no change in status.

Also on June 1, 2010, players and coaches can be added to the Got Soccer team building section, and information as well as birth certificates can be uploaded. Players and coaches will not be registered or rostered for 2010-2011 at this time; their status will be “Inactive”, but the data will be in place to prepare for the rostering process for the 2010-2011 seasonal year.

Between June 1 and July 15, 2010, all currently rostered players will remain on their 2009-2010 roster, even if they decide to change teams for the 2010-2011 season. Only players who during this period plan to participate in an FYSA-sanctioned tournament will need to ask for a release from their current team allowing them to be registered to their new team for 2009-2010 participation. As an alternative, the player can also ask for guest play permission and remain on their current team.

On July 15, 2010, all players will become “Inactive” in the current FYSA database and will not appear as registered or rostered. This is when we will complete the system change to Got Soccer. Clubs may then place players on rosters for the 2010-2011 seasonal year. **NOTE: Passes and rosters for the 2010-2011 teams, while available on July 15, will not be valid until August 1, 2010, and cannot be used in any league or tournament event.**

Leagues and tournaments must accept 2009-2010 credentials only during this time. Those few players who did not register or request a transfer prior to July 1, 2010, must have their pass and roster placement prepared in the FYSA office.

On or after July 15, 2010, coaches and players may be placed on rosters for the 2010-2011 seasonal year. Clubs must notify coaches of their risk management obligation. Once the coaches comply, they can be placed on rosters. Passes and rosters will be available for the 2010-2011 season at this time.

On August 1, 2010, all teams should be using the 2010-2011 season rosters and passes as 2009-2010 passes will no longer be valid.
