

Online Registration Vendors

FYSA's desire is to simplify player registration. There are third party vendors that permit online registration for players. These vendors allow affiliates the ability to have players registered electronically and collect payment without pieces of paper. For affiliates to be able to use these services and be in compliance with FYSA rules, FYSA has created guidelines. Vendors that have agreed to the terms set forth by FYSA will be allowed to use the term "FYSA Compliant." Affiliates who register their players through these vendors will not be required to have on file an "ink on paper" original parent signature.

Approved vendors will agree that they have taken reasonable steps to ascertain the identity of the person submitting the registration and that they will have this data collected and stored where it can be retrieved, if necessary, if a player registration is contested. They agree that there will be a complete record of the payment. Should FYSA contact the affiliate regarding a player's registration, the affiliate must provide FYSA with this information within two (2) business days.

FYSA has a specific parental waiver for players under the age of eighteen that must be used on all registration forms. This waiver must be included as a specific agreement on any online registration. No player (under the age of eighteen) will be allowed to register without their parent accepting the terms and executing this waiver.

FYSA will still hold its affiliates responsible for the submission of registration data to FYSA but the vendors are responsible for formatting the data in a manner that is easy for the affiliate to upload. FYSA does not encourage the practice of allowing vendors to upload data directly as there are questions and warnings and the affiliate needs to be actively in charge of this process.
