

## Conditional Pool

At the recent FYSA AGM, several registration rule changes were passed.

### **Players are no longer entitled to a release at any time.**

This change eliminated the need for the “conditional pool.” It will take some time for the changes to be made to the online system removing the conditional option. In the meantime, any affiliate that releases a player into the “conditional pool” will be notified that FYSA has received the request, however, that transaction will not be processed.

### **Note ---The player will not be removed from the team’s roster—be careful not to over roster the team.**

The unconditional pool will remain available for released players. Once the release is processed, these players can be selected for transfer by any affiliate. Those players will be designated as and considered “previously rostered players” for competition purposes.

Therefore there are two choices:

1. Release the player unconditionally---free to transfer
2. Maintain the player on the team’s roster
